

Centercode Releases Connect™ 1.5

Huge range of new functionality offered.

SAN CLEMENTE, CA., (06-13-2002) - Centercode, Inc., a developer of flexible software and service solutions that enable companies to manage and conduct product beta tests, today announced the launch of the latest version of their Connect software. Bursting with enhanced functionality, Connect was designed with the primary goal of making the beta testing experience as easy and successful as possible.

Connect is Centercode's proprietary software that enables companies to create and manage beta tests with the flexibility to fit the unique needs and infrastructure of each organization and project. Connect delivers a comprehensive set of tools that provide the basis for tester and team communications, extensive feedback tracking, real-time reporting systems, as well as numerous other beneficial features. This latest release offers users enhanced capabilities including simpler project setup and management, an improved reporting engine, and enhanced case tracking.

"Centercode continues to chart new territories in beta testing," stated Luke Freiler, Chief Technology Officer at Centercode, Inc. "Making the process of beta testing easier to implement while delivering powerful tools to better manage critical user feedback helps to make our clients more successful in their project management objectives, and ultimately, in the successful launch of their products. Our latest version of Connect does just that. With even more powerful reporting engines and case tracking tools along with simpler setup and management processes, we increase the amount of time our clients can spend on their ultimate goal: meeting their deadlines and objectives without worrying about complicated or limited beta testing tools."

Many new features have been added to Connect as well as enhancements to existing functions. Among these is increased simplicity in project setup and management, new project workflow capabilities, enhanced team functionality, additional access controls, superior knowledge base abilities, and an improved project content management system. Connect's complex reporting engine now enables users to build, print, and save custom real-time reports that meet their individual needs, without ever leaving their browser.

Case Tracking has been enhanced to allow users to quickly build their own views and filters of their cases (user feedback), enabling much easier management of large amounts of data. In addition, the history and tester participation tracking systems have been vastly improved to ensure enterprise level tracking of all project information.

Beta Testing Solutions

Conducting an effective beta test requires the right software, knowledge of effective beta testing methods, experience in conducting beta tests, and available staff time to manage the entire beta test process. Centercode understands that each client has different needs and resources. Further, those needs and resources are constantly changing.

As experts in the beta testing arena, Centercode delivers top-level tools and services to support clients in their testing needs, but also recognizes that delivering one solution to every client is not the answer. The Centercode response is to custom-build a solution to fit the needs of each project of every client. By approaching every project with total flexibility, Centercode is able to deliver exactly what the customer needs today - and tomorrow. This distinctive approach to delivering Beta Testing Solutions is what makes Centercode a leader in the beta testing field.

Centercode Commitment

Centercode knows that products and services are important, but client satisfaction is also a goal that they are striving to maintain. Centercode is committed to assisting clients in their efforts to conduct and manage beta tests in order to ensure the quality of their products.

Centercode fulfills this commitment by not only making every effort to make sure the client gets the full value from Centercode's products and services, but also by standing by the quality of those products and services. Centercode believes that long-term relationships are the foundation of a successful company. Client satisfaction is the basis for building those relationships.
